

YGOR BARBOZA ALVES

Fullstack Software Engineer

(Backend focused)

To create optimal market solutions, I utilize VueJS and ReactJS for frontend development, and Laravel, Symfony, NodeJS, and NestJS for backend development. In essence, my core stack includes PHP, JavaScript, and TypeScript.

ABOUT ME

I'm an outgoing cat lover and a fast-learning, open-minded, and solution-oriented developer with a passion for problem-solving. I'm always eager to tackle new challenges, learn new things, and apply critical thinking to solve real-world problems with unwavering commitment.

EDUCATION

2017 - 2020 - UNIVERSITY OF VILA VELHA - UVV

Bachelor's in Computer Science, but I had to stop in the seventh (7th) period (of 8), due to work.

EXPERIENCE

Aug/2022 - Sep/2023 NY-US Startup

Fullstack, Backend Focused Software Engineer
Developed new features, maintained existing ones, emphasized clean architecture, code, and SOLID principles. Primarily used Symfony and Laravel for Backend, Vue2/Vue3 + Typescript for Frontend, and PGSQL + MySQL for DB. Hands-on with Queues (SQS, DB, Redis).

Feb/2020 - Aug/2022

Back End Developer

Maintenance and development of legacy system in PHP and rewriting to Javascript using NestJS (NodeJS framework). New projects being developed in NestJS, Laravel(PHP) and Yii2(PHP). Frontend I use VueJS.

2017 - 2020

IT Support - SQL Database

SQL database technical support and customer service.

2016-2017

Graphic design assistant, produced arts using Adobe Photoshop and Adobe Illustrator.
